Janne Kujala

Turku, Finland | 050 307 3742 | jannekujala1996@gmail.com | LinkedIn | Portfolio: jannekujala.vercel.app

I hold a Bachelor of Business Administration and have over six years of experience as a specialist at Kela (the Social Insurance Institution of Finland), working with complex benefit processes, the application of legislation and multiple information systems. I am currently expanding my expertise through a conversion programme in Business Information Technology, and during my studies I have built practical solutions using Azure, Power BI, Power Automate and SQL, among others. My strength lies in combining business, technology and visual expression: I want to understand what an organisation is aiming for and develop customer-centric, clear solutions, whether in data, automation, reporting or user interfaces. My approach is analytical, curious and collaborative.

Skills

Business Skills: customer relationships and marketing, process improvement (Lean), project management, strategic foresight, profitability analysis, stakeholder communication
Automation & Microsoft 365: Microsoft 365, Excel, SharePoint, Power Platform (Power Automate, Power Apps, Power BI), requirements specification and technical documentation
Cloud & Data Analytics: Azure (Data Factory, Logic Apps, Azure SQL), SQL, data analysis and visualisation
Web Development: HTML, CSS, JavaScript, React, Next.js, Tailwind CSS, Figma, Webflow
Backend & Databases: PHP, MySQL, Python (basics), APIs Tools & Methods: Git, GitHub, VS Code, Jira, Confluence, Scrum, AI tools (Claude, Copilot, ChatGPT)
Languages: Finnish (native), English (good)

Selected Projects

- Data analyst agent: an AI agent that answers business questions using SQL queries, Claude API and Next.js
- Data architecture in Azure: Data Factory, Logic Apps, API-based workflows, analysis and visualisation
- Reporting solution: Power BI and Azure SQL, data collection and exploratory analysis
- Approval workflow automation: Power Automate and SharePoint, incl. technical documentation
- Company website: built with Webflow for a landscaping company
- Web application, group project: PHP and MySQL, Scrum, Jira, Confluence and requirements specification
